WORK HISTORY

TEAM LEAD 07/2018 to Current
Atharva System, Ahmedabad

- Led team in project planning and execution for software development initiatives.
- Analyzed project requirements to define scope and allocate resources effectively.

- Developed a mobile application using various technologies, such as Android, React Native, Flutter, and Flutter Flow.
- Tested the performance of mobile applications on multiple devices to ensure compatibility across different hardware configurations.

ANDROID DEVELOPER 05/2016 to 06/2018
Megait, Ahmedabad, India

- Developed Android applications using Java and XML.
- Designed user-friendly interfaces for various Android applications.
- Implemented RESTful APIs for seamless data integration within apps.

ANDROID DEVELOPER 08/2015 to 04/2016
WayToWeb, Ahmedabad, India

- Developed Android applications using Java and XML.
- Designed user-friendly interfaces for various Android applications.
- Implemented RESTful APIs for seamless data integration within apps.

EDUCATION

IGNOU, Ahmedabad, India
Master of Computer Application, 07/2012 to 05/2015

Gujarat University, Ahmedabad, India
Bachelor of Computer Application, 06/2008 to 05/2011

RECENT PROJECTS

SellMyRig | Flutter   Links: [Android](#)
App for managing buyer/seller data in the rig/utility vehicle market. Collects personal documents and connects with lenders for financing.

Moventum | Android   Links: [Android](#)
Portfolio management system for brokers to track and review client investments.

DoneZo | Flutterflow   Links: [iOS](#) [Android](#)
To-do app for daily and recurring task tracking with timely alerts and reminders.

SpinWheel | Flutterflow   Links: [iOS](#) [Android](#)
Custom and predefined spinning game where users can invite friends to play interactive decision-making games.

Live Now – Screen Recorder | Android-Kotlin   Links: [Android](#)
Streaming app supporting YouTube, Twitch, and other RTMP. Managed subscriptions and ads, and media conversion to GIFs.

Platform Marketplace | React Native
Built reusable blocks for payments (Razorpay, TapPay, Adyen) and chat (CometChat). Developed cross-platform UI and wrote unit tests using Jest and Enzyme.

HipPocket Training | React Native   Links: Android
Developed a military learning app with offline downloads, custom filters, and detailed feedback system. Supported both Android and iOS.

My Hooxy | React Native   Links: [iOS](iOS) Android
Integrated BLE and C++ bridging with Oximeter hardware for real-time exercise tracking across multiple users.

PayAnsh | React Native   Links: Android
Handled KYC, OTP, BBPS utility payments across 308 billers, and real-time Firebase notifications. Integrated Paytm and Cashfree.

LetsMarry | React Native
Social matchmaking platform with Razorpay, GeoLocation, OTP login, and real-time chat using action cable.

EnsureXpert | Flutter
Insurance app with complex charts, reusable components, and modular UI.

AIRO | Android-Kotlin   Links: Android
Portfolio and fund management with PDF statements, OTP login, and UI navigation.

WOW Group | Android-Java   Links: Android
Workout control via BLE, charting, and dynamic remote UI design.

Xporium Showcase (Exhibitor) | Android   Links: Android
Video/audio calling, event booking, chat, product upload, and Stripe payments for exhibitors.

Xporium (Visitor) | Android   Links: Android
Event browsing, live streams, exhibitor interaction, and payment for premium events.

Power Sentry | Android   Links: Android
Power monitoring app with alerts, auto SMS/email on outages, and alarm features.

Refer Textile/Wishbook | Android   Links: Android
Secure textile B2B marketplace with in-app chat, catalog access, multi-language support, and user privacy enforcement.
